

Miss Winifred Pink

Amateur Racing Motorist of the 1920s

The years following the First World War saw a great increase in car ownership among the reasonably affluent in England. Many different models of sporting small or 'light' cars became available, and many owners were keen to test the performance of their machines, and themselves, in competition. Up to the mid-1920s it was possible to hold speed events on public roads, and numerous hillclimbs were staged, so competitions were not just restricted to the race track at Brooklands – and track racing was still expensive and more the preserve of the trade and the very wealthy. These amateur enthusiasts were not all men, an increasing number of ladies also began competing successfully, some, such as Ivy Cummings becoming quite well known. Less well known was Winifred Pink, of Taunton, Somerset, who competed in many speed events throughout the 1920s in Horstman, Aston Martin and Alvis cars and, although entirely amateur, achieved considerable success.

Winifred Martha Pink was born on 10th September 1895 in Bromley, Kent, to Edward and Ellen Pink. Edward was a partner in the family firm E & T Pink, a jam and preserves manufacturer based in Bermondsey, South London. His father, Edward senior, had begun the business around 1860 and by the end of the 19th Century the firm was the largest manufacturer of jam and marmalade in the world.

Following the turn of the century, in retirement, Edward and Ellen, with daughter Winifred and son Edward Sidney, moved to a large house on Beach Road in Weston-super-Mare, Somerset. Edward was in poor health however and after his death in 1916 the Pink family moved to Taunton.

From an early age Winifred had been interested in mechanical things - she later related that she *"infinitely preferred a vertical engine to dolls"*, and Charles Jarrott's book *"Ten Years of Motors and Motor Racing"* to other more usual children's literature. She began driving when about 15 years of age, most probably in her elder brother's cars - Sidney, thirteen years her senior, was a keen motoring enthusiast. For around twenty years he was the Secretary of the Somerset Automobile Club, taking a very active interest in all motoring matters in the pioneer years of the 20th century, and in 1913 and 1914 competed in the Speed Trials run on the sandy beach at Weston-super-Mare in a 15hp Talbot.

Very early on, to gain some mechanical knowledge, Winifred had worked one winter in the repair shop of a local garage, and following the start of the first World War she joined the local (Somerset) division of the Red Cross's Voluntary Aid Detachment (VAD). Becoming a Motor School driving instructor, she trained girls to drive ambulances, her record card noting: *"Very capable driver mechanic. Most reliable."* In February 1918 she enlisted in the newly created Women's Royal Naval Service (WRNS), working at the Admiralty Motor Testing School until being demobilised the following January.

When Winifred's grandfather, Edward senior, died in 1910 he had bequeathed her £1,500 (£150,000 in current terms) on trust, so in the 1920s she was in a position to be able to buy her own cars, and take part in motoring competitions. With her mechanical knowledge she was able, as far as possible, to do most of the basic preparation work on her cars herself – helpful in keeping down the cost of competing.

Winifred in 1922

Her first car was a 10.5 hp Eric Campbell, a small sporting open two-seater, with polished aluminium body and a tuned 1498cc

Coventry-Simplex engine. Her first event, on 21st May 1921, was the Yeovil to Lands End reliability trial for light cars and motor-cycles, organised by the Taunton and District Motor-cycle & Light Car Club, to which she belonged. Successfully completing the 192 mile route, which included three observed hills, and crossing Dartmoor in a heavy mist, Winifred won the premier award in the Light car class, albeit only after two entrants placed ahead of her were ruled ineligible for awards. The Taunton club's next big trial, that October, was from Taunton to Lands End, however on this occasion rather than taking part, Winifred and her brother were official observers at Adcombe Hill, not far from Taunton.

1922-23: Horstman

Seemingly Winifred was more interested in speed events than reliability trials, for in 1922 she obtained a 1921 Horstman Super Sports (registration YA 1861), with which she began competing in hillclimbs and speed trials in southern England and Wales. Produced by Sidney Horstmann at his factory in Bath, the Super Sports also used the 1498cc Coventry-Simplex 4-cylinder engine, and was virtually a racing car, with two-seater body and sketchy road equipment.

Winifred gained an early success with the Horstman at Brooklands in April 1922, winning the three-mile Ladies handicap at the Junior Car Club's (JCC) Spring meeting. Then, at the end of June, she was in South Wales for two major events, the hillclimb at Caerphilly and the Porthcawl speed trials, competing alongside stars of the time such as Raymond Mays and 'Bertie' Kensington-Moir. Rain throughout the Caerphilly hillclimb made the road treacherous, and Winifred placed third in the Ladies class. The following day's speed trials, over a one mile course on the Porthcawl sands, were also made tricky by the weather, with the slow to retreat tide leaving patches of sand still soggy. However, Winifred easily won the Ladies class, and was also second in the 1200cc to 1500cc class.

During 1922 Winifred also attempted to create a new club for women motorists, encompassing both competition and social activities and aimed mainly at the owner-driver. The inaugural event of the new "Women's Motor Club" was a rally and gymkhana on the weekend of 14th and 15th October at the Lambert Arms, Aston Rowant, between Oxford and High Wycombe. Participating in the gymkhana herself, Winifred won the 'skilful driving' test, however the attendance was "rather disappointing". A further meeting was arranged for November 8th at the Women's United Services Club in London, but the new club doesn't appear to have survived into the following year.

Winifred in her Horstman Supersports at the Women's Motor Club gymkhana, 'Tilting the Ring' test.

Winifred began 1923 with the JCC General Efficiency Trial in March in a four-seater Horstman Tourer (registration FB 3248). Aimed at testing the overall performance of standard production cars this event began with a 25 mile road test, followed by other tests for speed, acceleration, braking, etc., at Brooklands. Although unplaced in the overall event, the Horstman was fourth fastest of all the touring cars on the speed test.

For speed events she now had a 1922 model Horstman Super Sports (registration YA5414), with a more rounded and streamlined body, and repeated her previous year's victory in the Ladies' handicap race at the JCC's Brooklands Spring meeting. In June she just missed out on a win in the JCC Dean hillclimb in Hampshire, while at Porthcawl, although this year the sands were dry and firm and much faster, she was slow away from the start and unable to repeat her previous year's successes.

Winifred at the 1923 Brooklands Spring meeting

1923 – 26 : Aston Martin

Mid-way through 1923 Winifred replaced the Horstman with a car which would bring her considerable success, the 1486cc Aston Martin sports tourer 'AM270', only the second Aston Martin to have been built, in 1921. The open three-seater car had already gained many race, hillclimb and trials successes in the hands of its designer Lionel Martin, and when acquired by Winifred was in its final form, with wire wheels and front-wheel-brakes.

In speed events in those days, in addition to straightforward competition against the clock, cars could also compete on "formula", where the formula took into account the weight and engine capacity of the car. In a rainy August hillclimb at South Harting, Sussex, Winifred had great success with her new car, collecting three first in class awards (one on time and two on formula), plus a pair of third in class awards.

Further successes followed at the Southsea speed trials on 25th August, on a mile-long course along the Esplanade, with cars running in pairs. Winifred featured prominently in the pre-event publicity, alongside Lionel Martin, SF Edge and Ivy Cummings. The event was part of Southsea Carnival week, in aid of the Mayor of Portsmouth's hospital fund, and Pink was a prominent name in the city, Winifred's distant cousin Sir Harold Pink being a former mayor. Winifred's haul of awards at Southsea (two firsts, two seconds and a third in class), was continued two weeks later at Shelsley Walsh with two more class wins and a third place on formula.

This trend continued through the remainder of the year, and throughout the next, with multiple class wins, on both time and formula, in hillclimbs at Aston Clinton, Dean, Angel Bank (Shropshire), Spread Eagle (Dorset), Shelsley Walsh, Caerphilly, and South Harting. While most of those events were in her own 'AM 270' she was also pictured at Shelsley Walsh (probably July 1924) in a different Aston (registration XT 4101). In those days carrying of a passenger was compulsory in many of the events, and on at least some occasions Winifred was accompanied by the car's designer, Lionel Martin.

On 28 March 1925 two accidents occurred at the Kop hillclimb in Buckinghamshire and a spectator was injured. Concerns over spectator behaviour at events on public roads had been growing for some time, and this was the last straw. As a result, the RAC forthwith banned all speed events on public roads, a move which had a devastating effect on motorsport in England. Rather than the multiplicity of hillclimb and sprint venues that enthusiasts had enjoyed they were now restricted to a few tracks on private land, such as Shelsley Walsh hillclimb, or, for a while, speed trials on sandy beaches, until they too were curtailed. For the next two years Winifred's appearances in speed events were reduced, and confined to regular Aston Martin outings at Shelsley, while in May 1926 she appeared in a 2-litre AC 'Montlhery' at the Skegness beach races. Here, where they raced in pairs, she was knocked out in the first heats of her races on the Monday and Tuesday programs.

1927 – 29 : Alvis

For 1927 Winifred appeared with an Alvis 12/50 open four-seater tourer (registration WK 1151). This was a Super Sports version, with short stroke 1496cc engine, which would easily exceed 70 mph, and she regained her winning ways. In June she won a gold medal in the JCC Reliability Trial at Brooklands. This year, cars had to cover 35 laps of the 'Trial' circuit, stopping after 10 laps to change one wheel and to furl and secure the hood; bettering the scheduled speed by 15% resulted in a gold medal. As the only female gold medal winner, Winifred very briefly featured in a short Empire News newsreel of this event.

Returning to Shelsley Walsh, in July Winifred achieved a 2nd in class, then at the September meeting, running in the formula class she carried off all three trophies, including the Midland Automobile Club's coveted President's Cup.

Continuing with the Alvis the following year, there was a class win at Shelsley in May, and a Silver medal at the Brooklands Reliability Trial in June. In July, with Prime Minister Stanley Baldwin among the 5000 Shelsley crowd, she won one cup, but was unable to retain the President's Cup, placing third. Still using the Alvis, 1929 was a less successful year, and at the September Shelsley Walsh event, with no Touring car classes and therefore having to run in the Formula Sports Car event, Winifred could only place 9th in class behind eight Riley 9s.

Beyond motor sport

As no further information on Winifred in competitions after 1929 has been found, it appears she may then have stopped competitive motoring.

At the outbreak of World War 2 in 1939 she was now living in north-east Hampshire, and running a sports Alvis. As Transport Officer, London, of the recently formed Women's Voluntary Service (WVS), she was in charge of a service garage in south-west London supervising the maintenance and repair of WVS motor vehicles during the blitz. From 1941 she also oversaw training of voluntary women ambulance drivers in southern districts of Hampshire.

Winifred died on 18th December 1957, aged 62.

Winifred Pink – known events

(Note – at many speed events entries could be made in more than one class, however competitors would still only have one run, with the time counting for all classes entered.)

1921

Saturday 21 May 1921	Taunton & District MC&LCC Yeovil to Lands End Inter-Club Reliability Trial. 192 miles			
Light cars	Eric Campbell 10.5 hp	300 penalty marks, 3m 30s error in time	1 st , Silver medal	
Winifred was the only lady driver in a car. Provisionally placed 3 rd Light Car, but promoted to 1 st when two competitors were disqualified following a protest, <i>“on the ground that the cars driven were not owned by a member of one of the competing clubs, and that they were merely demonstration cars”</i> . Heavy mist on Dartmoor, heavy rain from Truro to Lands End, & a dense sea fog at Lands End <i>“caused all competitors to arrive at their destination thoroughly soaked.”</i>				
Sources: Taunton Courier, Western Chronicle				

1922

Saturday 29 April 1922	Junior Car Club, Spring Meeting, Brooklands			
Ladies handicap race (3 miles)	Horstman Supersports 1498cc (YA1861)	58.5 mph	1st	
Four starters. Winifred won <i>“by the length of the finishing straight”</i> .				
Sources: Light Car & Cyclecar, Taunton Courier, The Times, Tatler, LAT Photo.				

Wednesday 28 June 1922	South Wales AC, Caerphilly hillclimb <i>Heavy rain</i>			
Cars 1201 to 1500cc	Horstman Supersports 10.5 (YA1861)		unplaced	
Cars driven by ladies, unlimited (open)	Horstman Supersports 10.5 1498cc (YA1861)		3rd	
<i>“the heavy rain had made the road, which normally can only be described as having a fair surface, treacherous” “Although unplaced Miss W. Pink’s effort in her 10.5 Hortsmann (sic) was admirable”</i>				
Sources: Western Mail, Motoring Picture Library				

Thursday 29 June 1922	South Wales AC, Speed Trials, Rest Bay Sands, Porthcawl. 1 mile course. <i>“unfavourable weather conditions”</i>			
Cars with engine capacity from 1201cc to 1500cc	Horstman 10.5 hp (YA1861)	1m 13.4s	2nd	
Cars with engine capacity unlimited, driven by a lady	Horstman 10.5 hp (YA1861)	1m 12.4s	1st	
Weather fine & bright, but <i>“a half gale of wind blew in from the direction of the sea”</i> , held up the tide & caused a 3 hour delay starting, the sands failing to dry completely.				
Source: Western Mail				

Saturday 12 August 1922	Bath & West of England MC, Hillclimb, Bannerdown, Bath.			
Light Cars	Horstman			
The event, for motor-cycles & light cars, was moved from the usual venue of Kingsdown hill, Bath. Winifred Pink was among 3 light car entries; her placing is unknown, but she did not win the class.				
Source: Bath Chronicle				

?? August(?) 1922	Tiverton MC&LCC, Hillclimb, Hone Hill, Chevithorn, Tiverton. Course approximately ½ mile			
Light Cars	Horstman	47.3s	2nd	
Interclub event, open to ACU South Western Centre affiliated clubs, for motor-cycles & light cars.				
Source: MotorCycle				

Saturday 9 September 1922	Devizes Hospital Week, Red Horn hillclimb, Urchfont, Devizes.		
Class 18, 1500cc cars (amateurs)	Horstman	58.4s	1st
Class 19, 1500cc cars (open)	Horstman	55s	1st
Class 20, unlimited cars (amateur)	Horstman	56.4s	1st
Class 21, unlimited cars (open)	Horstman	57s	1st
Event was for motor-cycles & light cars; Winifred Pink won all four car classes.			
Sources: Bath Chronicle, Wiltshire Times, Western Daily Press			

Saturday/Sunday 14/15 October 1922	Women's Motor Club, Gymkhana, Lambert Arms, Aston Rowant, Oxfordshire.		
Skilful Driving Test	Horstman Supersports (YA1861)		1st
Other tests were: Egg & Spoon race; Speed Judging; Threading the Needle; Tilting the Ring; Observation. <i>"The most interesting event was called an observation or fault-finding test, in which the competitors had to discover six derangements on Miss Pink's racing Horstman."</i> (photo, right)			
Other competitors included: Miss Lilian Roper (AC); Miss Leach (Oakland Six); Miss Woodhouse (Morris Cowley).			
Source: Light Car & Cyclecar			

Classified Advertisement, Light Car & Cyclecar, 10 November 1922.

"Horstman, 1921, super sports, fitted polished aluminium body, Palmer cord racing tyres and spares, dynamo, Hartford shock absorbers, 2 spare wheels, mileage 4,800; this car has taken 9 firsts, 2 seconds, and 1 third during the season, price £295. W.M. Pink, Sherford Lodge, Taunton."

1923

Saturday 17 March 1923	Junior Car Club, General Efficiency Trial, Surrey and Brooklands		
Overall	(#27) Horstman Tourer (FB3248)		unplaced
Class 4 – Touring four-seaters. Engine limit 1500cc		34 mpg* 51.66 mph*	4 th in class 2 nd in class
Objective of the trial was to test the general performance of standard production cars and included about a dozen different tests such as: reliability, hill climbing, petrol consumption, speed, easy starting from cold, slow-running on top gear, acceleration on top gear, braking, silence, springing, & manoeuvrability. The road test was over a 25 mile course starting at Kingston Vale, London, including tracks in Oxshott Woods, Surrey and the speed and other tests were held at Brooklands. An official observer was carried in each car.
